

Formula for getting rich and wealthy

Jasmin Hajro

Formula for getting rich and wealthy
Formula for getting rich and wealthy
Jasmin Hajro

Copyright 2023 Jasmin Hajro

hey hello

how are you doing

this is Jasmin Hajro from the

Netherlands here in Zelhem

this little beautiful Village in the

Netherlands

thank you for joining and how are you
doing today?

uh

there have been some things man

so maybe we should talk about that

and in case you're wondering what is up
with the blanket right

I am , I'm cold and I've

turned up the thermostat to 19 and a

half degrees so it's not cold in the

room

but I am cold To The Bone

and that has probably to do with the last
few days

so on Wednesday I was selling and I was
working and then it started to snow

right and I've made a very short video

about that for uh well you know the
maniac selling in the snow
and today I was also working and the it
rained all the time man so uh so I got
wet

my socks got wet and
now I'm, I'm just cold
but I think I have a very important
message to share with you
and uh

I must be a little bit careful about
it

uh

so if you like learn something
from somebody else or you
read something by somebody else
then

if you want to te;; or write about it
then you can

only do it with a quote right
and then you have to say who has
uh said it or written it
right

to give

credit to the original source

uh

so

um

I can tell you

I think I think man I think this is

this is like really important right

and uh so there have been a few things

I am

becoming an all the timer which means

I'm working seven days a week

every day

that is good ...

I obviously have sold more and I have

earned more

so it works very well for me

I also encourage other people to do so

uh we have reached more than 1 000

subscribers at YouTube and also more

than 4 000 watch hours

which means that

it is possible to

get paid a few pennies by YouTube right

and so

I was thinking about what

what now to do right and

I have just decided to put out
more valuable advice
valuable content right
that is
the best way
so for all you people who have
subscribed , who have watched my videos
who have liked and commented
thank you very much for being supportive
um
okay so let's uh
let's get uh to the point
uh
well maybe I can tell you a little bit
of my background right
so uh between 2007 and 2012
uh I've started working at lambdal Green
parks, in the kitchen
I started as a dishwasher and I worked
my way up until cook
and I was still living at home , I got
paid every month , I did not have much
expenses, so I had I had a lot of
savings right
and I was looking at well what can I do

to
to make my money grow right
so I read
some books on finance
I took some
courses on finance and investing
and I invested in stocks and in a bond
and in mutual funds
and uh
I had
read in this section on pensions that if
you
if you would like work
47 years or so in the country then you
get a full pension right
but if you're a immigrant ,
you just
came to the country and when it's your
time to retire you will only have like
20 years or 25 years of a work history
then you will get a pension cut right
so that's being the case for both of my
parents
that's obviously fucked up right
that

when you retire that's not the time to
stress about money
when you maybe not are, not even able to
work anymore right
that you don't have
enough money right for the living
expenses
so
so then I decided to become rich
because
then I could I could support them
financially and I could
fix this issue right
uh
so it was then that I had read this book
The Millionaire Next Door
it's a really good book
and I highly recommend this to you
and now
well you maybe know that after that I've
had some
some difficulties with failing with my
first business
and then it took a really
long time before I achieved success with

my second business ,that I now own
and there was all kinds of things right

so

but now everything is going well

thank God ,thank heavens right

and I'm again focused on

getting rich right

so

uh

I have to say this correctly right

uh so I think I have found the formula

for getting rich and getting wealthy

and I have learned it from Grant

Cardone

from this interview that he had with

Lewis Howes

he has this uh

podcast or YouTube channel

the which

is called the school for greatness right

and you should also check out that one

okay so now I will say it but I must say

that it

a quote right

because I've learned it

from Grant Cardone
so he has said
I think four things and then I myself
had added the fifth one
and they are
''earn money''
earn money so
work at your job or work at your
business
earn the money that's number
one
''keep money''
that is to save money right
the third one is
''multiply money''
if you can
buy five of these lighters for one dollar
and you sell them for
uh a dollar each
and you find five
customers.
you have earned five
dollars
you've multiplied the one dollar
into five dollars right

that's to
multiply money
hmm
and then he said the fourth thing is to
uh `` invest in assets that cash flow ``
preferably every month
so he is obviously invested in
uh real estate,
in houses ,apartments
that are assets
because they cash flow
the people are living there and they pay
him the
rent every month
his businesses are also assets because
they cash flow
the business sells
products and the money comes into the
business every month
so is mine business obviously and
so are books and courses
if you sell the
books and the courses and the money
comes in every month from royalties and
so on

that's also cashflow, that are also assets
and then the fifth thing is what I have
added

so end quote....

uh that is to ``create assets``

right so

Grant Cardone has obviously done that
with writing books and creating the
sales training and creating his
businesses and so on

uh but I have also done a bit of that
with

creating my business right....

first

there was nothing

then there was an idea

and now there is a legal business
structure that is

formed at the notary and now it's a
business right

and then

I used to buy and resell greeting cards
and then after a while I created my own
designs right

and I have also

written a bunch of books and maybe some
of them you should check out right
like
recipe for happiness
and
build your fortune,
the second edition
and a faster way to
riches and success
or is it faster way
to success and riches ?
it's been a while
and
if you
if you do these five things and you keep
doing them
and you repeat them
and
repeat them and repeat them
for months
and years
and decades
you're gonna get rich and wealthy right
so I was so excited about this man
I couldn't sleep right

so recently I am
I go to bed early like nine o'clock
and now it's a bit later
but tonight it will be 10 o'clock and
then I
put on uh put on YouTube
I put on an
audio book
and recently I'm listening to
The Millionaire Next Door
and yes I have
read it in the past
but now I am
uh I am listening to it on on audiobook
on YouTube
and I highly
recommend it to you and to everybody
so are the five steps uh clear to you
????????????????????

1. earn money
2. save money
3. multiply money
4. invest in assets that
cash flow ,preferably every month
but you

can also invest in stocks that produce dividend
(dividend is part of profits that company pays out to investors and shareholders)
every quarter or every year
that's also good
and then

5. create assets

write books

create courses

sell them

maybe you can build stuff

you can build sheds or houses

and sell those right

yeah

uh okay well thank you very much uh I

hope I have helped you

I hope you take

this to heart and you

start implementing

and start doing it

right

because there's no point in being a a

ATNA as Joe Girard calls them

all talk

and no action
right
if you do that then
nothing is gonna change right
okay maybe this would be good stuff to
write a book about right to go more into
depth into these things
well
maybe in the future
so this is really powerful and
life-changing man
you should really do it
I'm doing it and you should do it and
Grant Cardone and probably the other
guy
are also doing it right
okay so thank you very much and I hope I
haven't uh
well I've said
it's a quote right I've
learned it from Grant so I pass it
on to you
I don't think I did anything
wrong with that
thank you very much and uh until next

time okay bye bye

What have you learned ???

1 Weekend is for broke and poor people
start working 7 days a week....

The formula for getting rich and wealthy is

1 ''earn money''

2 ''keep money'' (save money)

3 ''multiply money'' (or invest in people or businesses that can multiply your money)

4 ''invest in assets that cashflow (preferably every month)

5 create assets that cashflow and sell products and services

Listen to the audiobook : the Millionaire nextdoor

on youtube

over and over

over and over

study it

like christians study the bible

and muslims study the quran

study it

untill you can lecture on it

it will impact your thinking, beliefs and what you do, your behavior

and your getting rich and wealthy.....

Like I said in my book Build your fortune

you will make yourself rich,

nobody else will do that for you

On the following pages you can see my investment portfolio

I am invested in 37 companies that pay out dividend

do the same....

Keep investing until you have stocks of 1000 companies that pay out dividend
and reinvest the dividend

As you can see
I walk my talk....
I do what I teach
and yes I work 7 days a week
and I save money
I invest money in assets ,dividendstocks
I multiply money (I buy 5 greeting cards for 1 euro and sell them for 1 euro a
piece
and multiply the 1 euro into 5 euros)
I listen to that audiobook every night
I create assets ,mostly books and unique greeting cards
Now YOU Get to work !!!!

About the Author

Jasmin Hajro

founder of Jasko Investments,

foundation Giveth Life,

and Hajro International BV.

Author of 53 books,

on health, wealth, happiness, sales, business and success.

Selling packages of greeting cards door to door

for 7+ years.

On 24 january he made 10 sales in 1 day,

on 27th january he made 16 sales in 1 day,

on the 2nd and 4th february he made 20 sales in 1 day.

He designs the greeting cards him self.

He also writes, designs covers, translates and publishes his

books him self.

He has sold more than 600 paperback books since 2017,

and more than 400 Ebooks.

More than 1500 free ebooks written by Jasmin

are downloaded worldwide.

That is more than the average author does,
and Jasmin is in the top 10% of authors in the world,
because the other 90% give up writing after 1 or 2 books
that flop.

He sold more than 23,340 greeting cards by him self with door to door selling.

He is a true and selfmade successful business owner
and a sales expert.

Go to hajro.online or hajro.co for more

How to achieve more and have more money

Hello

how are you?

Thank you for considering reading one of my books.

It is not for the easily offended....

But it might just be the kick in the butt that you need...

Do you know what you want out of life?

Do you know it exactly?

If you don't know it, how are you going to ever get it ?

I think goal setting systems forget 2 things.....

So this is what I want you to do...

Take a pen and 3 sheets of paper..

On the first sheet write down your goals

all the things you want to have

want to do

and want to be....

On the 2nd sheet

write down 100 reasons

why you want to accomplish those goals....

You won't get very far with 2 reasons for doing something

but you will be unstoppable

with 100 reasons....

On the 3rd sheet

write out daily activities

that you are going to do

that are goal achieving...

For example

if you want to write a book

Your daily activity is to write at least 1 page everyday

and after 50 days

your booklet is finished and ready to be self published...

Step 4

Do your daily activities every day...

until you achieve your goal...

Do you want things...

Do you say that ?

I want to be healthy

I want to be happy

I want to be rich

I want to be a success

Well ?

Do you say those things ?

Do you think those things ?

You are stuck in WANT....

Change your language...

From now on

you say : I do this daily activity

to accomplish this goal...

See the difference ?

I work every day on this

so that next year

I have

Action language

Last Sunday

I went out

selling

at the field

at uh at 12 o'clock

and uh

where I had found like eight customers

pretty soon

so I made a real short video

about that for uh for about one minute

and in it I was asking you

like uh what the hell are you doing ?

right

Well and then so I started that I had to

go with the bike to this little village

of Varsseveld

because the this bus doesn't

drive there in the weekends and it was

Sunday.

So I went there with the bike and I
started selling at 12 o'clock and at
five o'clock
five five five five
o'clock and ten minutes
I had made 20 sales and I earned a
hundred euros on a Sunday in five hours
right....

And then the question is
if a guy with a
disability can do that
then what the
fuck are you doing with your life ?
right

I was tired afterwards,
but it was worth the effort...
I just had a visit from my mama
and she bought me nice flowers
and she's very very happy and proud
that I am doing this good
so this booklet
is gonna be
a bit different
than what you are used to getting
from me
and

I will uh I will tell you why
So now that I am averaging
20 sales a day
earning 100 euros
a day.

When you become successful
you have more
money but you have less time
because you

are working more.
So I will be
I will be less on YouTube
making videos and giving free advice.
So maybe you have
you have
been to my website www.hajro.eu
I wrote
I'll say you
I've made this
myself with a website editor
and now a friend of mine is making
a professional website for me
and it's also because I'm tired
of
trying to help people
that are too lazy to help
themselves
okay
so what I want you to do
take your wallet
take some money out of it
and then you tear it up
and then you
take a lighter
and you set the pieces on fire
In an ashtray
don't burn the house
all right....
I tried myself to make a more
professional website
for my business
and then it turned out it wasn't
necessary ,
because my friend is already
making one

which looks even better
but on this website I've written that
my books and my advice will only help 10
percent of people
and that are the people that implement.
so in case you don't know what that is
you learn something ,
and you take action on it !
Have you been thinking and asking yourself
so what is the difference between
success and failure ?
It is implementation....
So we have the 10 percent of people that
are really successful and Rich
but they didn't start out like that
most of them started out just
like you and me
they were broke and
they were ignorant of the industry
and of the business that they are now in
and they were also
ignorant about
how to become successful in that field
we all start at the bottom 10 percent
when we have nothing
right
and what separated these 10 percent from
the other 90 that are still struggling
and that are
still broke at the end of every month
and so on.....
They learned and then they implemented
what they learned...
do you understand that ?
So now we have this situation
me ,the successful business owner the

successful salesperson
told you to get your wallet get out
Get the bill of money
to tear it apart and to burn it...
Have you done it ?
if you have
then congratulations to you
you already have won half the battle
you will become successful and you will
become rich
guaranteed....
if you haven't done it
you have failed
and you will remain a failure
I know this is a bit uh tough love
but people need a kick in their ass
to start doing what is required
so let me explain it to you
first
you have failed to implement
you have a teacher a successful person a
credible person that tells you
do this
and you don't do it
you neglect it
you don't implement
if you don't implement what you learn
you can forget success
you can forget getting rich
there's no book
there is no course
there is no seminar
there is no coach
there is no person
there is no fucking business
there is no God

that will ever help you
if you don't implement
second
you have failed to take action
all the successful people are action oriented
they're always moving
another thing
you have not given yourself
the chance to have the realization
right
the realization
an epiphany
that money is easily replaceable
because
I have now torn it apart and burned it
if I in the next hour go out and sell
greeting cards and someone buys
I get a new
money bill
If after that you go work for 1 hour, you get new bills of money.....
that means it is easily replaceable
you have to have that realization
so
another thing is
you have failed at the fourth thing
and that is to get rid of your fear of
losing money
nothing happens if you lose a bill or some money coins....
you're not gonna die
ain't nobody gonna
fuck you in the ass until you bleed
there's nothing gonna happen man
it's
just fucking paper all right
you have to get rid of that fear
so that you can

start taking actions that are not so comfortable
so that you can make investments that pay you money every year
every three months
every half year
do you understand ?
it's very important
because at some time you can like go extreme
and work seven days a week
80 hours a week
but that's all you got...
that's all you can do...
after that you must save and invest
to make that money grow ,
because you can't do any more than what you are already doing...
you cannot be afraid to make mistakes or to lose a fucking bill of money
it will inhibit you to success
to riches
to everything
what if there is a book....
and the book says to you
do whatever you need to do
if that means throwing out your television
out of the window
sell your car ,take the bus or whatever
just to make sure that every month you save 200
dollar or Euro
and that you invest 200
dollars
every month

in for example uh dividend stocks that
pay out
dividend to you every year
and your savings pay out interest to you every year
and if you just do that
then within 35 years you will be
financially independent
your savings
and
your investments will yield you like 40 or
50 000 a year
and you would not have to work anymore
you would be financially independent
right
so now every idiot can do those three
things...
Throw out the television
sell the car
go with the bus
save 200
invest 200
for 30 or 40 years
uh
and what then
if you read this
and you understand this
and it makes a whole lot of sense
and you even understand that after a while
you get
interest on interest on interest on
interest
which makes your
savings grow even faster
and you get
dividends on dividends on dividends on
dividends where it will in the future

multiply after 20 years or so
and make it grow exponentially
you get it
and it makes a whole lot of sense
and it's actually what you want
because
you want to be financially independent
but then you just
don't do it
you don't implement
and what then happens
people go online
and they give the book a one star review
and they complain because their life
hasn't changed
well is it the fault of the author ?
or
are you just uh
neglecting to do it
he or she that says
she wants to be or become a millionaire
you have to become a all the timer
which means that you work seven days a week
which means that you get paid seven days
a week
which means that you have a lot
a lot
more money
which means that you can save a
lot more and invest a lot more
and you
shorten your path to becoming rich
and it is being proven by thousands and
thousands of people maybe even by millions
and you hear it
and you know that it is correct

and then
you just
don't do it
so let's get back to this example
of
of taking out a money Bill
tearing it apart and setting it on fire
if you haven't done it you have failed
on four things
but actually at five
and the fifth one is that
you fail to become the master of money
so what I said is crazy to you
uh it's uh insane
you are not
but that just
keeps you being the slave of money
instead of
ripping it apart setting it on fire
understanding that the next day
that you
work an hour and you get more
new money
and that's easily replaceable
and that
you are the master of this fucking shit.
and that it is not the master of you
so you fail at those five things and the
first one is the most important one
that is to implement
to take action on what you learn until
you get the results that you want
so if you are in sales and there is this
book out
on how to double your
sales

you have to get it
just to read it and
apply it
you're not gonna make excuses
like oh
oh the book has no reviews
oh I don't
know this guy
or I don't know maybe I'm
gonna get scammed for three dollars and
then I'm gonna lose my life
because I
lost three dollars
oh my God this and
this....
shut the hell up man
get real
get serious about what the fuck you want
since when has this fucking shit
happened in society
that people
grown adults can't make a fucking decision by
themselves for the thing that will make
their lives better...
that they need
fucking 10 reviews
10 opinions of others that they don't
know
and then if they think it's okay then
they can join or get the book
do you do that?
a lot of people do
do you call yourself an adult ?
that
is not the fucking thinking of an adult
that is not the thinking of a

success-oriented person that is the
thinking of a little child

I really hope that you take this to
heart and to mind
and that you reread
this often

I have given you a whole lot of value
if you are not in the implementation Club
just decides to join them

just decide to join the 10 percent of the
successful people

and then whatever it
is that you learn from

a video

a book

from an audio

a podcast

a seminar a webinar

or a coach or a

successful person

you just take it and

think about how can I implement this

and

then you implement it

and you keep

repeating it until you get the results

right

I hope that you now understand why 10
percent of the people are successful and

Rich

and why others ain't

I hope that you also know that you are always

welcome to join the 10 percent

but you must be willing

to implement

on what you learn

otherwise nothing can help you and no
one can help you

all right

I wish you all the best like always

I wish for you and for me and for

everybody

health wealth happiness and

success

but it depends on you if you will get

those things or not

all right I wish you all the best

thank

you and goodbye

Do you think that when you work and earn every day

7 days a week

you have more money ?

and you can save and invest a lot more

and that it will grow and accumulate faster

and make you rich faster ?

If you are paying the price of success every day

by working and earning every day

are you a success ?

Are you fucked in the head

a lot

by television ?

Have you seen the story

the movie

In minute 1

when the story and movie start

the guy is broke

and homeless

and 100,000 dollar in debt

And after 1,5 hours

he is rich

successful

and famous...

After watching that a 1000 times

it affects your thinking and your behavior...

You want this magic thing

that will make you

a overnight success....

That is what people want...

There is no such thing

only scammers promise such a thing...

In reality

success and riches

take implementation

hard work

self discipline

saving and investing

a lot of fucking hard work

and that for many decades

Yes, not years

but decades....

Do you see that you are fucked in the mind

by television and movies?

Throw it out of the window

and cancel netflix

Start implementing

and achieving your goals...

let me ask you this and you'll just be

brutally honest with me all right

so you have a family

everybody has a family

you have cousins and nieces

do you know all the names and all the

birthdays of your cousins and nieces in

your family ???

be honest now

but but

you do know

about the people on the movie you know

you know

about the people in the television show

that you're following

right

you know what your favorite actor is doing

what he's earning

where he's living

right

you know what these people are doing who

they're fucking

what they're earning

what is going on
you know it all
but about the people that matter
in your family
you don't know
you don't know their birthdays you don't
know all the names
of your cousins and nieces
don't you understand how fucked up that
is
don't you see that you're really fucked
and you are fucked hard in your
head by the television
so
open up a window
pick the thing up and
throw the motherfucker out ,the tv
and cancel your subscription
and cancel
your Netflix subscription
and start start producing
right
it's not a wonder why you are not
getting the things that you want
right
so Grant Cardone is right
he says in
one of his videos or books what you
should be doing that is
earn money
keep money which means save money
and then multiply money
right
you buy five pens for a dollar or five
greeting cards for a dollar
and you sell them for a dollar a piece

and you get five dollars back
for your one dollar infested
that's how
you multiply money
that's why you need to invest in
businesses and dividend stocks because
they will multiply your money right
and don't tell me that you get this
that you understand it
show me
take action on what you learn
show me
that you've understood it
show me a picture of
the broken television in your yard
right
show me that you get it
I really wish you all the best
all right

So,

what have we learned ???

The biggest and only reason why the 10 % of people are rich and successful
and the other 90% endlessly struggle
is because the 10% implement
they take action on what they learn...

And then

every book helps

every course helps

every seminar and webinar helps

and so on...

Are you ready to implement ?

You need to earn money every day

and save and invest every day

to shorten the path to getting rich...

You need to get rid of the fear of losing a bit of money...

You need to invest in assets

that are things that pay you money

invest in mutual funds

invest in bonds

invest in dividend stocks

invest in yourself

invest in people and businesses that can multiply money,
and give you back more or double the amount that you have invested...

Buy real estate

Create assets, books, courses, products that you can sell

Forget tv and netflix, use that time to learn marketing or sales or copywriting

every business needs people that know how to get them more customers

those are skills that can pay you money

If you want to invest in my business Hajro International

I will double your investment

within 1 month or 1 quarter....

That is what you need

a vehicle to multiply your money !!!

the new website is being made at hajro.co

About the author :

Jasmin Hajro

founder of Jasko Investments,

foundation Giveth Life,

and Hajro International BV.

Author of 53 books,

on health, wealth, happiness, sales, business and success.

Selling packages of greeting cards door to door

for 7+ years.

On 24 january he made 10 sales in 1 day,

on 27th january he made 16 sales in 1 day,

on the 2nd and 4th february he made 20 sales in 1 day.

He designs the greeting cards him self.

He also writes, designs covers, translates and publishes his

books him self.

He has sold more than 600 paperback books since 2017,

and more than 400 Ebooks.

More than 1500 free ebooks written by Jasmin

are downloaded worldwide.

That is more than the average author does,
and Jasmin is in the top 10% of authors in the world,
because the other 90% give up writing after 1 or 2 books
that flop.

He sold more than 23,340 greeting cards by him self with door to door selling.
He is a true and selfmade successful business owner
and a sales expert.
